## Nature-based Solutions Monitoring SaaS "Green Insight"

- Analysis solution for project registration, monitoring, and verification of natured-based carbon credits.
- Solutions for municipalities and forestry businesses to estimate forest resources and detect illegal logging using satellite data
- Cloud-based visualization, viewing, and exporting of analysis results (in preparation)

|	
Company name	Archeda, Inc.
Service Overview	We provide optimal analysis solutions for each stage of the carbon credit project development process, including site selection, project registration, monitoring, and credibility checks. Our focus is on nature-based projects in forests (ARR, REDD+, etc.), paddy fields (AWD), and mangroves. We also support international methodologies such as VCS, Gold Standard, and Joint Crediting Mechanism. Furthermore, we provide solutions for municipalities and forestry businesses to estimate forest resources and detect illegal logging using satellite data.
User	・Carbon credit developers, issuers and purchasers ・Forestry businesses
Satellite	・ALOS-2（Sensor：PALSAR-2） ・Sentinel-1,2 ・Other commercial satellites, etc.
