

## Forest Monitoring service "MIMAMORI GLOBAL"

We support sustainable supply chain management and carbon credit creation using satellite imagery. The results of our analysis can be used in sustainable reports, CDP responses, EUDR responses, etc.

Company name	KOKUSAI KOGYO Co., Ltd
Service Overview	Now that climate change and deforestation are being seen as issues that could affect the survival of private companies, businesses that take into account the perspectives of ESG investment, TCFD, and TNFD are being called for. Kokusai Kogyo provides various services to support supply chain management and the creation of carbon credits through the analysis of time-series optical satellite images and its own monitoring system.
User	Private sector companies
Satellite	Optical satellite
