

Envision the Future

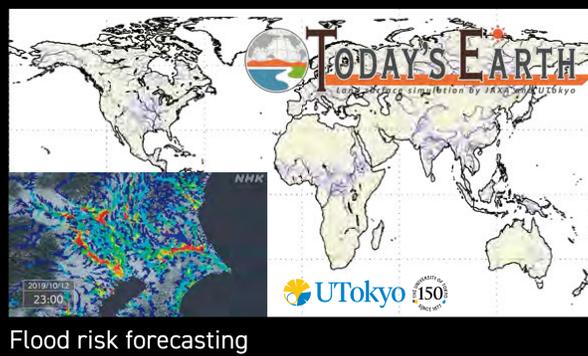

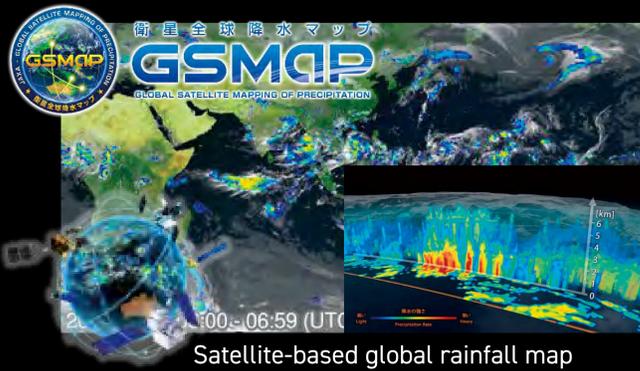

Strategic Priorities and Societal Benefit Area

Global Water-related disaster risk and resource management

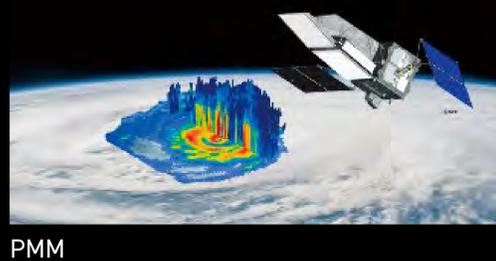

Challenges

1.4 Billion affected (2000-2019)
 Doubling of Death (in last 10 years)
 US\$155B in Losses (in last 50 years)

Develop and deliver water-related solutions using high-resolution, borderless simulation models and satellite-based rainfall information

Satellite Missions

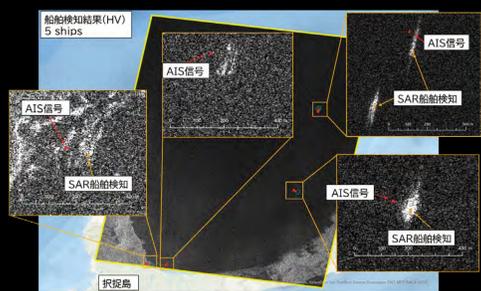

Maritime Observation

Challenges

Enhancement regional maritime observation capabilities across wide ocean areas through international cooperation

Strengthen capabilities for monitoring maritime activities and conditions through an extensive satellite observation network.

Satellite Missions
