

g green carbon

Our Product

- Carbon Credits are instruments that allow the owner to offset its emissions by sponsoring decarbonization projects.

- Carbon credits are often criticized as greenwash due to low project verifiability and lax monitoring.

Power Technology

Report: majority of carbon offset projects globally are “likely junk”

Analysis found that 39, or 78%, of the 50 environmental projects were categorised as “likely junk or worthless” due to one or more “fundamental failing”.

How we develop decarbonization projects

Rice

3.3Mt CO₂e

**Annual
(TWD 1B)**

Sugarcane

0.2Mt CO₂

**Annual
(TWD 1B)**

Carbon Farming

2Mt CO₂

**Annual
(TWD 1B)**

**Through activities to generate carbon credits,
we will realize a Green Space that will lead to
increased incomes for farmers.**
