

Cambodia-Japan “Co-Creation” Networking Symposium (II Action)

~ Seeking Carbon Credit Business Opportunities in Cambodia
Using Cutting Edge Green and Space Technologies from Japan ~

The Japan External Trade Organization (JETRO), in collaboration with the Japan Aerospace Exploration Agency (JAXA), has formed a special partnership with the Cambodian Oknha Association (COA) and is excited to introduce the latest Japanese technologies aimed at promoting decarbonization.

This symposium will showcase cutting-edge, green and space technologies from Japan, focusing on key sectors, such as the agricultural, forestry and industrial sectors. Our goals are to create economic opportunities by matching Japanese innovations with Cambodian businesses, generating carbon credits and, ultimately, promoting sustainable practices.
